

As a satellite radio subscriber, I urge you to reject the National Association of Broadcasters' petition 04-160. I pay for satellite radio because of its superior and commercial-free content. The NAB's attempt to ban "locally oriented" content is really an attempt to stop competition from a technologically superior product. Should we ban cable TV because it competes with local TV stations? Should we ban cell phones because they compete with local phone companies. Of course not. Don't stop technological progress. Instead, embrace it -- and allow free enterprise to thrive in America. Let me listen to what I want on satellite radio.
